A. GRACE Prop.

There was a fair crowd at the G. W. V. A. Dance held in the Big Hall last Friday. Those present enjoyed the excellent music supplied by the McGowan Orchestra.

The local ball team journeyed up to Veteran, on Tuesday, but met defeat at the Fair. The Veteran players proved themselves better run getters, the score being 12-7. Dickson, who played in right field, never had an error all day, not a ball going his way. There must have been something wrong with the water, or something, as some of the boys were not feeling just right somehow.

Dr. J. M. Anderson, Dentist, is to carry on the dentistry work here for Dr. Buggins.

Dr. Anderson will be at the office today, on Thursday and Friday of next week, and after September 1st the office will be open every week day.

The local School opened last Monday for the full term.

H. McCarron is shipping five cars of cattle to St. Paul, today.

Benedicts Turn The Trick On The Bachelors

The annual battle-royal took effect on the local diamond, last Friday, and when the dust of conflict had cleared the official score announced that the married men had the long end of the score, same being 4-3.

Some brilliant playing was staged during the seven frames until darkness put an end to the game, the spectators enjoying the tilt immensely.

The bright and outstanding stars of the single men were Watson and McGirr. Tommy gained his notoriety by covering lots of ground but not the ball, and for the number of hits he failed to get. McGirr stepped into the limelight when, after making a perfect hit into the right field, he got lost on the way to first and started to run around the race track. After his remarkable sprint Mac had the misfortune to be tagged out at second. That old war-horse, Ab Baxter, twirled for the winners and kept the bachelors hitting holes in the atmosphere, while Pat Stewart had the poor old married men reaching for his wide out-curve. Earl Davis had always been a dark horse in baseball, but he showed his wares in this game and was on the winning team. Jack Grace graced the right field garden but would rather watch a game than play it. Tarr played a fine set at first and Thompson starred at third.

Married men: Tarr, Ehlinger, DeLorme, Thompson, Baxter, Saski, McCulloch, Davis, Grace. Single men: P. Saski, N. Saski, Watson, McGirr, Stewart, Purdy, Sleightholm, Dickson, Helgerston.

Regular Monthly Meeting of the G. W. V. A. will be held on Saturday afternoon, August 30th, at 4 o'clock.

A hearty invitation is extended to all returned men of the district.

ALERT ALTARIO

The holidays are passing and next week will see School open and the children once more at their work. It seems a pity that there is not an attempt made to organize Children's Sports, for the necessity of play is absolute when one is young. Most cities spend considerable sums on their young folks' welfare and we commend to the town authorities the development of the "community sense" which could accomplish much to make life less grey and monotonous. In the long winter evenings the school should be our social centre, offering musical and dramatic entertainments, addresses, lectures, moving pictures, debates, etc. In the summer time it would be a fine thing for the children to have a summer camp, say at Coates Lake, where they could swim and play to their hearts content. Next year we hope to materialize this idea and so fill the dull void of a vacation that offers nothing but leisure.

The wiring crew is here and soon the telephone work will be completed and Altarios may ring up their friends for a business or personal call. It is a privilege to watch the evolutionary processes of 20th century civilization. Here where the prairie is strewn with buffalo bones we find the wizard power of electricity performing wonders and forging links in the chain that will lift the farm dweller to the heights of the comforts cities offer. A modern farm home, in the Fat West equipped electrically, is to our way of thinking, one of the triumphs of this electric age.

It is good to feel that recently there has been breathed into our midst a spirit of achievement that has for its object the well-being of the sick, the cure of injured and the provision for the coming race. For once we are all unanimous, in the desire to establish a cottage hospital the men's and women's organizations working hand in hand, and in the unity which is strength we shall attain success.

Mrs. Mesbit and family returned to Toronto after spending a long and enjoyable visit at the McLeod home.

Rev. Amos has become a very popular preacher, which is the best compliment a minister can obtain. The Schoolhouse was filled to the doors on Sunday evening and a thoughtful, intelligent interpretation was given on the text "God is our Rock."

Remember there is to be a Patriotic Lecture that will be worth walking miles to hear. The subject is "Canada at War."

C. J. and Mrs. Staley returned from an extensive auto tour, this week, taking in Regina and visiting old friends at Horizon.

If any student of sociology would care to read the report of the Social Service Congress, held at Ottawa, we will be glad to lend them a copy. Some excellent papers in it are "The School and the Rural Problem," "Humanizing of Religion," "Call of the New Day" and "Political Parity."

A summer sickness seems to be going around about amongst old and young accompanied by headache and severe pain. The homely but helpful remedies we heard of are a hot compress of moist heat, a dry-heat application made of a baked magazine, put the book in the oven till well warmed then cover with flannel, a bag of hot salt is good. Diet should be sparing and a dose of safe clearing medicine is desirable.

Your Stationery

Normal Schools Open Next Month

On July first the reciprocal arrangement between the four Western provinces for the recognition of teachers' certificates came into effect. Now teachers trained in any of these provinces receive similar standing in the others. This has resulted in a getting together of those responsible for the teacher-training policies of the various provinces. In a general way standardization has taken place in the length of the training required for the various certificates. Hereafter, in all the provinces, the period of training will be eight months.

For a long time it has been recognized that the four months training was entirely inadequate. The course was crowded and hurried and it was possible for very immature young people to get the certificate to teach and still be very indifferently equipped. The lengthened course will mean a more complete equipment. In addition to more detailed courses in the various subjects to be taught there will be greater opportunity for demonstrations by the Normal and Practice Staffs, as well as for more practice teaching on the part of the teachers in training. The longer course will cost more money. This will mean that young men and women will go into the work of teaching seriously and with the idea of devoting several years to this type of service. The larger period of training cannot but result in a better class of teachers and a more stable profession.

There are two Normal Schools in Alberta, one at Camrose and the other at Calgary. Both are well staffed and have good buildings. Enrollment for the next session of the Normal Schools, which opens on Sept. 2nd, is now taking place. All enquiries concerning admission should be addressed to the Deputy Minister, Department of Education, Edmonton, and those concerning living accommodations to the Principals at the Schools.

The owner of a Ford is not tied to the highways. He can run his car wherever a horse can take a buggy.

One reason why there are 160,000 Fords in Canada is that the Ford will travel roads that are impassable to other cars.

**Every Farmer
In This District
Should Read The
Nor'-West Farmer**

Western Canada's Oldest Farm Paper

If you are already a subscriber you will want to renew your subscription for another year, and if you are not a subscriber to it you ought to be. No farmer in these days of high prices and labor shortage can afford to do anything but his very best. Through a good farm paper you will get ideas worth many times the small subscription price. Each issue of The Nor-West Farmer is full of valuable information that any up-to-date farmer can use to his own direct advantage. It is edited for the whole farm family. If any reader wants information on any subject relating to either their farm problems or anything else The Nor-West Farmer and legal adviser is at the service of every subscriber, free of all charge. If you have a weed problem, a soil drifting problem, a feed problem, tractor, automobile, or gas engine trouble of any kind, read The Nor-West Farmer, and you will soon get a wealth of ideas from the experience of other farmers who have experienced and solved similar difficulties. The Nor-West Farmer is a "round-table," around which the best farmers of Western Canada meet. Will you be one of them?

Note and Comment

The true function of the fanning-mill is to remove weed seeds, light grain and any coarse material that may be present. For this work it is indispensable; no seed should be sown which has not been thoroughly cleaned and graded. There are, however, certain limitations to this method of selection which are not always appreciated by the grain grower.

All impurities cannot be removed by the use of the fanning-mill as is sometimes claimed. It is true that a large part of them will be removed, but there are always kernels of wheat, oats and barley that cannot be separated. A short, plump, pin oat cannot be removed from wheat nor can a long, plump kernel of wheat be removed from oats. Barley and oats present a very difficult problem and the per cent of impurities remaining is much larger.

Fanning-mill selection maintains the yield of a pure variety but does not increase it as many suppose. To grow pure grain of strong vitality, the fanning-mill must be used in conjunction with the seed plot. In this way fanning-mill selection reaches its highest point of efficiency. All plants that are different in type can be removed before harvesting and this leaves to the fanning-mill only the work of rejection of the weed seeds and inferior grain. This combination ensures pure grain and maximum production.

The Tax Notices of the local School District for the current year have made their appearance. One pleasing feature is the big reduction in the mill rate for this year, there being a drop of 7 mills on the town rate, and several mills lower on farm property.

It is the intention of the School Trustees to make a very vigorous campaign to collect the outstanding taxes, which amount to a considerable sum, and they hope that those in arrears will pay up, without having to collect same by any legal action on the part of the School Board.

The minimum price of wheat in Canada has been fixed at \$2.15 a bushel, thus closely following the price in the States.

While crop conditions are not of the best, in this district, they are not as bad as was at first

feared. The majority of the farmers will get their seed back and a considerable number will have some wheat to sell.

But there will be little or no return for their year of labor or on their investment, but all are looking forward to better times for next year.

An exchange says a good cabbage and a bad sinner both have hard hearts. It doesn't say what kind of a heart the good sinner has.

Many a man salts away his money in the brine of other people's tears.

A boy who left the farm to go to the city wrote a letter to his brother, telling of the joys of city life, in which he said:

"Thursday we autoed out to the country club, where we golfed until dark. Then we motored to the beach and Friday there."

The brother on the farm wrote back:

"Yesterday we buggied to town and baseballed all afternoon. Then we went to Med's and pokered till morning. Today we muled out to the wheat field and gee-hawed until sundown. Then we suppered, and then we piped for a while. After that we staircased up to our room and bedstedded until the clock fived."

Here are the Self Starters—innocent looking typewriter keys—that force an automatic speed gain of 15% to 25% on ordinary correspondence.

110-6th, Ave., W., Odd Fellows' Bldg., Calgary, Alta.

The Outstanding Product of a Large Manufacturing House

FOUR large factories and five distributing warehouses stand back of Brandram's Genuine B.B. White Lead.

Every step in its manufacture is closely watched by chemical engineers—nothing is left undone which would help to maintain the quality of the world's finest white lead.

Brandram's Genuine B.B. White Lead

is different from any other white lead. To begin with, it is corroded by several secret processes which are then merged into a pigment of marvellous smoothness. This pigment is ground no less than five times, first under huge stones, and finally between heavy steel rolls. In this grinding process, it is made into a pulp by being mixed with pure refined linseed oil made in our own linseed oil mills.

Whenever you paint, use Brandram's Genuine B.B. White Lead if you mix your own paint. If you want to save the labor of mixing you can ensure the use of this quality pigment only by getting B-H "English" Paint.
